

Your AI Avatar Pipeline

Film yourself once — then your avatar posts for you every day. This is the exact HeyGen + ElevenLabs + agent pipeline behind the reel that sent you here (yes, that was the avatar).

01
Film One Short VideoOnce, ever

Record a 2-minute clip of yourself talking to camera — phone is fine, just good light and clean audio. Upload it to **HeyGen** and its **Avatar V** engine learns how you talk, gesture and move. That one clip becomes an avatar you can reuse forever.

02
Clone Your Voice5 min
Upload the same clip's audio to **ElevenLabs** and create a voice clone. Now any script you type comes back as YOU speaking it — with word-level timestamps, which is what makes automatic captions and cut-on-word editing possible.

03
Let The Agent Assemble ItThe system
An agent (I use **Claude Code**) writes the script, generates the voiceover, sends it to your avatar, overlays titles and captions, and hands the finished reel to **Zernio** to post and run the comment-to-DM automation. You approve; the system ships.

The pipeline, one command each

Copy

\$ node vo.mjs # script → your cloned voice + word timings
\$ node heygen.mjs # voice → your Avatar V lip-synced video
\$./composite.sh # titles + captions + SFX → finished reel
