

AI MADE THIS. HERE'S THE PROMPT.

One consistent character. A loft walk at dusk. Comment DROP and you get this page.

STEP 1

LOCK THE MODEL

Generate one clear character still first. Same face, same wardrobe. That photo is your actor for every shot.

STEP 2

STORYBOARD STILLS

Reuse the model as a reference. Make 8–12 angles: walk, close-up, over-shoulder, window, hands on tablet.

STEP 3

ANIMATE THE HERO

Image-to-video the best landscape still. Prompt the MOTION only: walk, dolly, shallow DOF. Keep her identity locked.

COPY THIS PROMPT

Editorial cinematic: late-20s woman creative director, short wavy dark brown bob, black tee under open light linen overshirt. She walks through a creative loft at dusk, tablet in hand, warm tungsten + cool blue-hour light, shallow DOF, premium film grade. **No text, no words, no logos, no watermarks.**

ONE FACE FIRST

Never start with video. Lock the still, then every frame inherits her.

PROMPT MOTION

In i2v, describe camera + pace, not a new character.

QC THE FACE

Reject morphs. Small thumbs hide flaws. Zoom before you ship.
