

THE LEAKED AI SYSTEM PROMPTS

The GitHub repo with the real system prompts behind Cursor, Lovable, Manus, Claude Code and 28+ AI tools. 142,000 stars. Free. Here is how to use it.

01 OPEN THE REPO FREE

GitHub: [x1xhlol/system-prompts-and-models-of-ai-tools](#). 142k stars, 34.8k forks, updated 2 weeks ago. Every folder is one tool's real prompts.

02 STUDY ONE TOOL PATTERNS

Start with **Cursor's Agent Prompt**. Notice the pattern: role, rules, tools, examples, refusals. That structure is why it feels smart.

03 STEAL FOR YOUR AGENTS APPLY

Copy the structure, not the words: **role + rules + examples** in your own Claude prompts and agents. Instant quality jump, zero cost.

TRY IT NOW • COPY PASTE INTO CLAUDE

```
> Read this system prompt and extract its structure:  
role, rules,  
> tool use, examples. Then rewrite MY agent prompt  
using the  
> same structure. [paste any prompt from the repo]
```
