

AI AGENTS FOR BUSINESS OWNERS

Three agents that run your marketing while you run the business. They find what your customers search, create the content, and track every click. No code.

01 FIND WHAT THEY SEARCH TREND AGENT

A free **trend agent** checks Google, YouTube and TikTok every day and lists what your customers actually type. You never guess a topic again.

02 CREATE ON AUTOPILOT CONTENT AGENT

Agents turn those topics into **daily posts and reels**, and answer every comment and DM with your links. Your content calendar fills itself.

03 TRACK TO MONEY DASHBOARD

One dashboard joins it all: **comments → DMs → clicks → customers**, live per post. You see exactly which content makes money and double down.

ASK CLAUDE CODE TO BUILD YOURS • COPY PASTE

```
> Build me a business agent starter: a trend agent that finds
> what my customers search, a content agent that drafts daily
> posts from those topics, and a dashboard tracking every click.
```

WANT THE WHOLE TEAM INSTALLED?

The full setup + my agent workflows, inside AI Creative OS.
