

THE CONTENT ENGINE STARTER

Your content makes itself: an agent writes it in your voice, designs and cuts every scene, posts it and answers the DMs. You direct. No editing.

01 IT WRITES IN YOUR VOICE SCRIPT + CLONE

Claude writes the script from what people actually search. **ElevenLabs clones your voice** from 60 seconds of audio and speaks it. Zero typing, zero recording.

02 IT DESIGNS + CUTS SCENES

The agent designs every scene, syncs cuts to your words, and adds your sounds. **A full reel renders itself** while you do something else.

03 IT POSTS + REPLIES AUTOPILOT

It posts to Instagram, TikTok and Facebook, then answers every comment and DM with your links. Your calendar fills itself, every day.

ASK CLAUDE CODE TO BUILD YOURS • COPY PASTE

```
> Build me a content engine: write a 15s reel script in  
my voice  
> from a trending topic, voice it with ElevenLabs,  
design the  
> scenes, cut on word starts, and post it with a  
comment funnel.
```

WANT MY WHOLE ENGINE INSTALLED?

The exact pipeline + weekly system
drops, inside AI Creative OS.
