

YOUTUBE VIDEOS FROM ONE PROMPT

VidRush: the new AI that researches, scripts, edits and delivers a publish-ready long-form video from a single brief.

01 BRIEF IT STEP 1

Go to **vidrush.ai** and type one prompt: topic, style, length (6-40 min documentaries and top-10s). Tag a brand profile + A-roll style right in the brief.

02 SIT BACK STEP 2

Five AI specialists work in parallel: researcher, scriptwriter, motion designer, editor, sound designer. Real **licensed footage** matched to the story; **generated motion graphics** fill any gap. V1 in under an hour.

03 EDIT BY CHATTING STEP 3

A real drag-and-drop timeline with a **Rush Agent** chat panel. "Shorter intro, different B-roll, swap the music" – plain English. Render when it's right.

TIP 01

Put the format IN the prompt – documentary / top-10 / explainer sets the whole structure.

TIP 02

Reference your brand profile every brief so the channel stays consistent.

TIP 03

Paid tool (from \$99/mo, ~\$2-3 per finished minute) – cheaper than outsourcing one edit.
